SUMMARY   Before attending Grand Circus' Java Bootcamp, I worked in customer service and sold realistic portrait drawings. Even with my passion for art, I decided it was time to pursue more realistic career goals with another passion of mine: computer programming. I developed this passion starting at age eleven by learning HTML, then went on to excel in high school with web design, VB.net, and Python through hours of research and practice each day. I knew I would also do well at Grand Circus, where I have gained new skills like Java, SQL, Hibernate, Spring MVC, OOP, Web APIs, and more. I will add value to any company because I am intelligent, hard-working, and a great problem solver willing to go above and beyond to excel at her passion for coding.

EDUCATION   *Grand Circus Detroit*   *2020*
